How do we benefit your business with Amazon Netsuite Connector?

We ensure it runs every necessary process in one system, so you get the whole picture clearly and it helps you decide the next move with clarity. It helps you get rid of all the unnecessary tedious jobs you need to do manually as it automates these jobs mentioned above. It charges a one time fee and rids you of the many ongoing costs otherwise; it makes the work easier and increases productivity.

NetSuite Amazon Connector is a successful application and a tried and tested module already installed in many other companies. In this integration, the data of the Amazon settlement Report is also included in NetSuite.

Key attributes of Amazon Netsuite Connector ?

Products and Inventory:

The NetSuite Amazon Connector supports many items of the catalog and then it can be attributed to Amazon Webstore developer and can be sold at Amazon.

Sales and Fulfillment:

When Connected with Amazon, the NetSuite Dashboard will alert the customers particularly when a product is available.

Settlement:

Apart from all the technical advances, this connector will also reconcile with cash sales of Amazon. You can process your tax liabilities of the taxed items in Amazon.
