

Global Business Management

NetSuite OneWorld delivers a real-time, unified global business management platform for enterprises that manages multinational and multi-subsidiary operations at a fraction of the cost of traditional on-premise ERP solutions. NetSuite OneWorld helps global businesses improve operational efficiency by delivering real-time visibility and consolidation and providing the flexibility to customize the solution for specific corporate and subsidiary needs.

Capabilities of Global Business Management

Global ERP

Global E-Commerce

Global Services Resource Planning

VGovernance, Risk and Compliance (GRC)

How our services benefit your business?

Global Business Management Platform

Enables the effortless management of multiple subsidiaries, business units and legal entities.

Real-time Access Anywhere

Provides real-time global business insight. Access NetSuite from anywhere in the globe.

Compliance

OneWorld has been built to support both global standard and country-specific audit and tax regulations.

What features do we make our best of?

Global ERP

OneWorld addresses the complex multinational and multi-company needs of global organizations. You can adjust for currency, taxation and legal compliance differences at the local level, with regional and global business consolidation and roll-up.

Global E-Commerce

OneWorld allows you to conduct e-commerce around the globe with multi-language, multi-currency, multi-country and multi-brand web stores that all can be run and managed from a single NetSuite system. You can manage web stores worldwide—each in their location-specific language and currency.

Global Services Resource Planning

OneWorld Services Resource Planning (SRP) streamlines the complete services lifecycle from marketing to project management, service delivery, billing and revenue management—and helps you drive repeat business from existing clients.

International Capabilities

NetSuite helps companies manage global operations including multiple currencies, taxation rules and reporting requirements across geographies and subsidiaries, while providing real-time financial consolidation and visibility.
