

Open Air

OpenAir is the world's best solution for project management, resource management, expenses management, and project accounting & timesheet.

NetSuite OpenAir's PSA software supports your entire services organization with real-time visibility and anytime, anywhere access to the tools and information you need.

What features do we make our best of?

Timesheet Management

OpenAir allows you to manage your timesheets to match your business needs. Organize timesheet management the way that makes the most sense for your business needs, making it easy for your employees to know what they need to track and where and automate approvals accordingly.

Expense Management

OpenAir helps to maximize the accuracy and timeliness of expense reporting and overall expense management. You can automate and streamline the entire expense management cycle, including submission and approval processes, expense reporting, while integrating with project invoicing and accounting.

Project Management

OpenAir allows you to create revenue and cost estimates for engagements, and use "what if" project planning scenarios to optimize price, staffing, billing rates, and margin. You can view pipeline reports, gaining visibility into future enterprise revenue and profit opportunities.

Resource Management

OpenAir offers centralized access to up-to-date, easily searchable profiles of resources skills, experience, interests, language expertise, availability, work preferences, and more, empowering you with the information you need in real-time.

Reporting and Dashboards

The OpenAir Business Intelligence Connector allows you to easily extend your services delivery data. Based on the OData connection point, this connector is supported by many reporting and business intelligence applications. You can use it to publish the content of your saved reports so that they can be read by a compatible application.

Invoicing

OpenAir project accounting functionality eliminates the need of calculating project profitability, so you can quickly identify and repeat the most profitable projects. OpenAir's project accounting functionality provides revenue recognition separate from project billing to support exactly how your organization measures profitability.

Project Budgeting

NetSuite OpenAir Budget Management enables teams to track detailed cost budgets on a project by project basis. You can create simple to multiple stage approvals on budgets with full alerting and tracking ability. Use the standard workflows to manage the typical project budget approval scenario.

OpenAirCONNECT

OpenAirCONNECT provides a set of tools to manage integrations with financial/Enterprise Resource Planning (ERP), Human Resources (HR), Customer Relationship Management (CRM) applications and more.
