

SuiteSuccess

SuiteSuccess is engineered to solve unique industry challenges that historically have limited a company's ability to grow, scale and adapt to change. Most ERP vendors have tried to solve the industry solution problem with templates, rapid implementation methodologies and custom code.

How does SuccessSuite benefit your business?

IT management and resources

- Business continuity costs reduced 45% to 65%
- IT support costs reduced 40% to 65%

Financial Management

- Audit completion and support time reduced 25% to 40%
- Time to close financial books reduced 45% to 70%

Business Visibility

- Reporting time and resources reduced 40% to 55%
- 360° visibility and actionable insights increased 55% to 80%

What features do we make our best of?

Build

SuiteSuccess supports your entire modern business, including CRM, ERP, PSA, HR, Business Intelligence (BI), and omnichannel commerce built on the NetSuite cloud platform.

Engage

SuiteSuccess offers leading practices for each industry and role, including KPI reports, workflows, dashboards, and metrics, with the flexibility to personalize on the NetSuite platform from the initial sales contact to on-going support.

Consume

SuiteSuccess allows companies to consume capabilities based on their business needs. You get a re-imagined consumption model that drives faster time to value, greater user adoption, and better ROI.

Optimize

SuiteSuccess benefits customers from updated leading practices, continuous engagement, new feature releases, movement up the stairway, and value added SuiteCloud partners.
